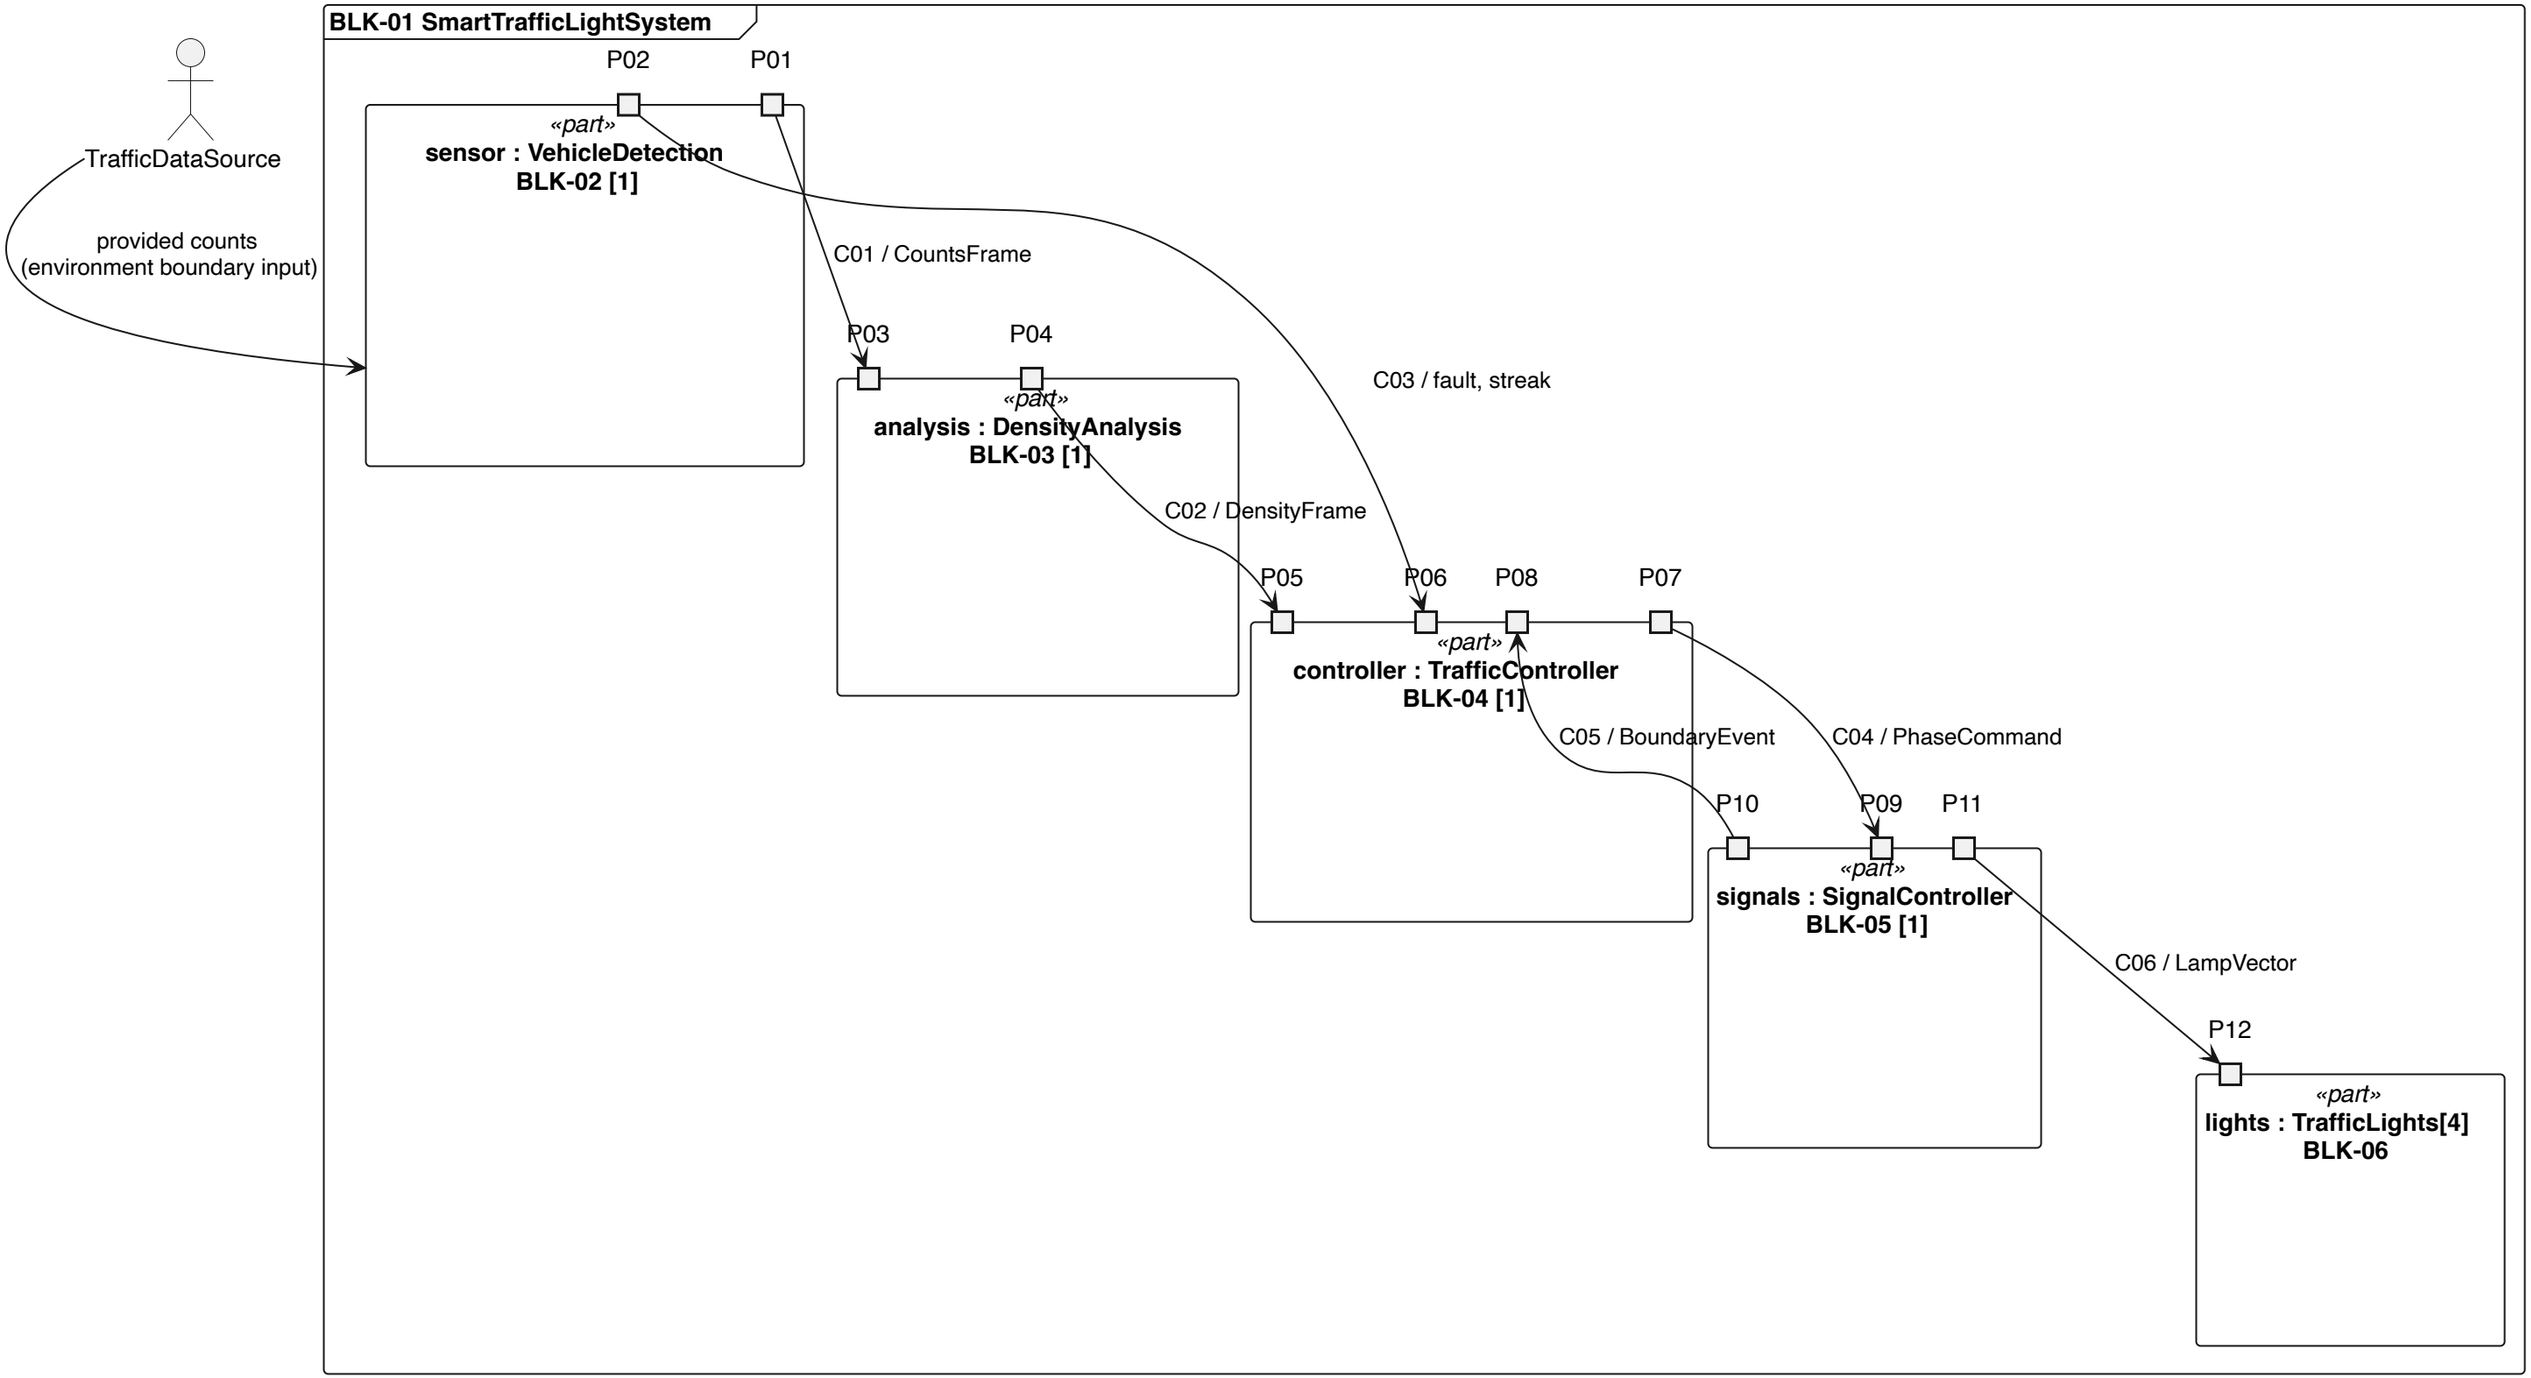
**SysML IBD - context BLK-01 SmartTrafficLightSystem**



«part» is a renderer annotation for a SysML part property.
Port IDs P01-P12: typed proxy ports; types/endpoints in model dictionary.
Each directed connector line combines an assembly connector with an item flow;
arrow indicates item direction, not a satisfy dependency.
P12 is a bundled presentation of four conjugated port instances;
LampVector has exactly one entry per approach (fan-out by approach).
